

Doo Your Part, Pick up the **POO Pledge!**

Pet waste is more than just an eyesore and a potential mess on your shoe. It causes water pollution that can seriously harm our local waterways.

When dog waste isn't picked up, rain washes it into streams, rivers, and ultimately the Chesapeake Bay.

Dog poop carries bacteria, viruses, and parasites that threaten our health.

Dog poop is not a fertilizer. Dog's have a high protein meat-based diet that creates poop with high levels of nitrogen and acid that is bad for the health of yards and plants.

Dog poop may take up to a year to fully decompose.

I know what to Doo, I pledge to:

- Always pick up after my dog, even in my own backyard.
- Always carry pet waste bags when I walk my dog.
- Encourage others to pick up after their pets.
- Be a protector, not a polluter!**

First Name: _____ I would like my name to appear on the Poo Pledge web page.

Pet's Name: _____

- Post our photo on the Clean Green Team's Instagram and Facebook page to show we've made the pledge.
- I'd like to receive Clean Green Team email at _____

Dog poop is not a fertilizer.

It's harmful to humans and other animals. Pledge to always pickup after your dog, encourage others to do so as well, and you'll be Doo-ing your part to help our waterways!

Fill out the pledge and mail it to The Clean Green Team and we will send you a waste bag dispenser (while supplies last.)
