**Don't let another hour fly by without
accepting my invitation to become the
newest member of our prestigious
Wealth Society—before our
membership drive closes in only 24
hours.**

**On behalf of all our analysts here at Investing
Daily, we IMPLORE you to carefully consider the
remainder of this message... and see if it makes
sense to join us at this critical time in history, as
we pledge to guide you to the biggest rewards
with the least risk we can find.**

Dear Subscriber,

Phil Ash, Chairman, Investing
Daily Wealth Society

Trust is an interesting phenomenon to me. What makes you

trust someone? Upon what basis do you determine whether or not a person or ideology is worthy of your trust?

If you're like me, you have been touched by the profound wisdom of Thomas Jefferson. There are so many quotes from him, I have a difficult time selecting any to discuss with you, as I must leave out so many others equally meaningful for our country today.

Jefferson's Warnings Are Loud and Clear About the Government's Predisposition to Limit Our Economic Freedoms!

"I predict future happiness for Americans if they can prevent the government from wasting the labors of the people under the pretense of taking care of them."

"The two enemies of the people are criminals and government, so let us tie the second down with the chains of the Constitution so the second will not become the legalized version of the first."

As I consider these amazing insights from this highly-respected Founding Father and lover of liberty, I am at once proud of my country and saddened.

Americans have lost trust in our government! A huge majority of my fellow Americans do NOT believe that our government is on the side of individual economic liberty.

And it is this very individual economic liberty that our Constitution was all about. Freedom was not fought for and won only to be trampled and reverted to a modern-day version of TYRANNY.

So My Question Is, Who Can We Trust?

I realize I am speaking to you as Chairman of Investing Daily's

Wealth Society, and as such have a built-in bias about how well our Wealth Society serves our members.

But as I deconstruct the principles, one by one, that have formed the foundation for this elite group of individual, self-directed investors as members of the Wealth Society, I uncover the strong pillars that support us.

The pillars that support the Wealth Society are our well-respected analysts here at Investing Daily. These men tirelessly work with the highest degree of integrity to bring you solid investing analyses month after month, year after year – in both good times and bad. They are some of the very best!

So, to my question about who I can trust... **I trust my team.** Hundreds of thousands of readers also trust these dedicated men in a world where precious few can be trusted for anything, much less to tell you the truth in matters of investing. **But their reputation depends on your success.**

Please allow me to share just a few comments from our subscribers so you can see for yourself how these men and women, just like you, have put their trust in our analysts and have reaped big rewards for doing so.

The Benefits of Wealth Society Membership

As a Wealth Society member, you get every single Investing Daily publication and any new one that we add. In fact, we’ve just added a 12th service in late September, *Australian Edge*

just added a 12th service in late September, *Australian Edge*, written by David Dittman and Roger Conrad.

Because of its abundant natural resources and enviable geography, Australia is the front-line exporter to all the new Pacific Rim economies. These hungry, growing countries **must** buy what the Aussies have in abundance.

Australian Edge explores every aspect of the country. We think it is one of investors' last frontiers of untapped wealth! David and Roger bring you 80+ top-notch Australian companies, with super-high yields and rising dividends.

There's no recession Down Under, so Australian equities are cash-rich and well managed. These companies are leaders in energy, mining, finance, telecom, pharmaceuticals, biotech and consumer sectors.

And just this April, we added *Jim Fink's Options for Income*. Due to overwhelming demand, we had to cap the number of subscribers. Now you can't even buy it if you want to. But it's free with your Wealth Society membership.

And we've already begun the background research for our next product to launch in February 2012. We never stop searching for new investment opportunities for our Wealth Society members.

As a Wealth Society member, you'll gain access to an amazing collection of top-notch investment analysts who cover all aspects of the stock, bond, international and ETF marketplaces.

It's like your own advisory roundtable at your disposal where you get expert advice on growth, energy, utility, income, options, emerging markets, ETFs, Canadian income stocks, Australian high-yielders, portfolio hedges, Master Limited Partnerships and short-term trading... all in one place... just for our Wealth Society members.

Our investment analysts are committed to guide you confidently toward wealth protection and growth, during good times as well as bad.

Advanced Services:

***Utility Forecaster*—Your guide to safe, stable high-income and growth stocks**

For more than twenty years, *Roger Conrad's Utility Forecaster*

For more than twenty years, Roger Conrad's Utility Forecaster has delivered 13%-plus annual gains like clockwork from the world's best high-income and growth stocks on the planet. He helps you create an endless stream of safe, steady income for life. Roger, one of the nation's foremost utility experts, brings you in-depth coverage and expert analysis of investment opportunities in electric, water, natural gas and telecommunication utilities, week in and week out.

Personal Finance—A one-stop, proven investment source

Your one-stop source for market-beating investing advice.

Elliott Gue scours the world for the best investments—whether a stock, bond, MLP or commodity—to build and protect your wealth no matter what the market does.

Personal Finance gives you in-depth insight and analysis that cuts through the noise and hype to reveal the truth about the economy, the market and your investments. In today's volatile market, our 37 years of proven, battle-tested experience will show you the smartest path to profits.

Global ETF Profits—Authoritative guidance from the ETF pros

The majority of traditional mutual funds are open-ended, actively managed and run by self-appointed “expert” stock-pickers. In contrast, most exchange-traded funds are baskets of stocks, usually reflecting market indexes like the S&P 500. Studies show that a passive, market-index investing style—the kind most ETFs offer—beats about 70% of all investors over time. Editor Ben Shepherd and the pros at *Global ETF Profits* will help you balance your portfolio with steady, growth-primed income and the safety of diversification.

Benjamin Shepherd's Wall Street—Following Louis Rukeyser's footsteps, with expert stock guidance for independent investors

It can be difficult to watch your net worth bounce up and down like a yo-yo. What's key to remember is why we own stocks in the first place: because over every long-term period, stocks have paid off better than any other investment. Following in Mr. Rukeyser's footsteps, editor Benjamin Shepherd and his team introduce you to the experts and insights that will deliver the best stock market guidance available anywhere.

- *MLP Profits*—started in May 2009 and delivered **38%** returns last year.

You Get ALL This for a Tiny Fraction of the Value!

For just \$2,995 per year. the first 100 people to order will have unrestricted access to all our analysts by phone and email—and **everything** we publish for as long as we publish it. (Plus all the other things I wrote about above.)

You don't even have to pay the entire fee up front. **Pay in quarterly installments** of only \$795, if you prefer. It's your choice.

But wait... it gets even better! You're already a valued subscriber to one or more newsletters, right? But you will NOT be keeping your individual subscriptions any longer because you'll be getting everything we publish on your Wealth Society website.

So we will credit **ANY** amount you have paid in advance on any subscription (for unused portions). For example, if you have two years left on a \$300-per-year service, we will deduct \$600 and charge \$2,395, once you're accepted into the Wealth Society.

The last time we accepted new Wealth Society members, we credited each one an average of \$617 upon joining!

In the end, you may end up paying practically nothing for getting SO much value!

With our 100% money-back guarantee, you have nothing to lose! During the first 90 days, if you decide the Wealth Society isn't what you expected, just write, call or send an email. No questions asked. We'll promptly refund your full \$2,995 (or whatever portion of the total you've paid).

After the 90 days, you're still not at risk. If you're not thrilled with your membership, you will get a prorated refund at any time and for any reason whatsoever.

I'm convinced you'll find tremendous value in your Wealth

Society membership. Most of our members have been with us for **three or more years!**

In times like these, it's good to know there's a place to turn for sound advice. And that is our promise to you... to give you the best researched recommendations, so you can make informed decisions.

One of our Wealth Society members wrote...

“As always, I am reminded of how valuable the Wealth Society membership is to my investing decisions. I use the Wealth Society website every day we have access, and I depend on your editors to identify worthwhile, solid investments... when to get in and, even more importantly, when to get out. Roger, Elliot and Yiannis are our guides to the equity and bond markets. And now Ben provides up-to-date insight into mutual funds....”

—*Charlie and Luanne Shiverick*

I also want you to have a free, autographed copy of *The Rise of the State*, the newest book by Yiannis Mostrous, Elliott Gue and David Dittman. It's yours with my compliments.

One of our members wrote that he found this book to be such an “eye-opener” that he was passing it to his great-nephew for his birthday reading assignment. “A wonderful piece of assembled knowledge and facts,” he said.

When you stop and think about it, there's really no good reason to say “no” to my offer, is there?

You're already paying for at least one newsletter, so it just makes good business sense to simply allow us to apply a credit for your existing subscriptions... and get everything we publish all in ONE place!

published all in ONE place.

Then you can take a **full three months** to decide if you like getting **every single piece of information** that every single one of our top-notch analysts writes on every type of investment available... to be your guiding light through these challenging investing times.

Doesn't that sound like a good deal? It did to our current Wealth Society members, too, especially because they enjoyed an average return of 32.2% on **ALL** 23 of our model portfolios in 2010.

To be clear, I'm not talking about single picks, but for entire portfolios. Pretty impressive, wouldn't you say?

That's 17% higher returns than the S&P! How does that measure up to your total gains last year?

Now, to be perfectly above board, we may not fare quite as well when all the numbers come in for 2011. But we're on track to continue our decades-long history of handily beating the major market indices.

Now, you CAN count on the best returns possible, using the most solid, smart strategies you'll find anywhere... and by people you've come to trust year after year.

As you know, our recommendations are designed to protect our subscribers' hard-earned capital. Our analysts watch their picks like a hawk—and alert their subscribers immediately when it's time to buy or sell.

We take our commitment to you, our subscribers, very seriously. And it shows in gains.

Let's Look at a Few of Our Portfolios' Returns from 2010...

63% from *Global Investment Strategist*—a portfolio of mostly Asian stocks.

37.6% from our Master Limited Partnerships (MLPs).

40.7% from our 'Proven Reserves' conservative energy portfolio.

39.4% from our Canadian Income Trusts and corporations.

17.7% from our conservative 'Power' portfolio of utility stocks.

When you become a Wealth Society member, your total savings is a surprising \$18,905 over 5 years, by paying a much smaller amount for **ALL** of our esteemed advisories, instead of subscribing to them individually.

In Conclusion

As the chairman of our Wealth Society, I feel a special pride in what we offer our community of members. And on behalf of all our members and analysts, I would like to offer you this rare opportunity to join our exclusive group!

We all look forward to **meeting you personally** at the next Wealth Summit, which will be held at the Four Seasons resort in Palm Beach, FL, in May 2012.

And we'll have many other opportunities to meet you at an annual dinner with your favorite analyst, on quarterly conference calls and much more.

If you have any question whatsoever, just call our customer service team at **800-832-2330**. A friendly, helpful staff member will answer any question you have.

I honestly don't know of a better group of fellow investors you could associate with than our Wealth Society members. They, like our analysts, are standing by to welcome you to our elite group of serious-minded, self-directed investors.

**With 92% of Our Members Renewing
Every Year... We Must Be Doing
Something Right**

Together, we expect to succeed for our subscribers. We are passionate about what we do, and we do it very well. Where else can you find entire portfolios that average **32.2% returns** ... even in a pretty challenging year?

Continuing throughout the next decade, we'll likely see some historical challenges. And we'll be in the trenches, keeping you informed like never before. We're in it for the long haul, and we do NOT intend to let you down.

We continue to aspire to even better returns for our subscribers year after year.

For our Wealth Society members, we simply give you much, much more of what you're already profiting from—and a LOT of special attention! We hope you'll join us and profit even more in the future.
